Item 8.01 Other Events.

On August 1, 2025, BioXcel Therapeutics, Inc. (the “Company”) announced the last patient last visit in the SERENITY At-Home Pivotal Phase 3 Safety Trial for Acute Treatment of Agitation Associated with Bipolar Disorders or Schizophrenia. The SERENITY At-Home Phase 3 trial is a double-blind, placebo-controlled study designed to evaluate the safety of a 120 mcg dose of BXCL501 for the acute treatment of agitation associated with bipolar disorders or schizophrenia in the at-home setting. The trial enrolled more than 200 patients across 22 sites nationwide, with no single site enrolling more than 11% of the total patient population. Distribution of patients was balanced between the two patient populations, bipolar disorders and schizophrenia, and the vast majority of patients dosed completed the full 12-week study. The Company collected data from more than 2,200 agitation episodes in the trial, with topline results expected to be announced this month.
